Freebie Friday: Grunge Brushes

by Caleb Kimbrough on July 8, 2011

This is a collection of eight free grunge Photoshop brushes to use in your designs. They vary from heavy to subtle and measure 2500px on the long side, so you should be able to find one in here that works perfect for your project. To use them, simply open the .ABR file with Photoshop and select the brushes from the brushes palette. Enjoy!

8 Free Grunge Brushes
Add some interesting effects...
Scale and position your logo and text in relation to the grid and baselines.
Type out a navigation bar – set the location

Add a visual cue to highlight the active menu.
Type out a navigation bar – set the location
Main feature is to add a large photo...
Add some secondary features

How to train your Goldendoodle!

Famous Dog Stories

A long time ago, a little Dalmatian puppy sat outside the fence at the school. The puppy loved watching
Coding the header and navbar
The navigation bar is going to be done by the `nav` element. It will have an ID called `header-nav`.

Bootstrap classes:
- `navbar`
- `navbar-default`

You have a "base" class and then a sub-class that uses the base class, plus adds something to it.
Remember, there are two types of containers: container and container-fluid.

We do want to stretch the background of the nav bar – you define the color here.

Why do you think the container is within the nav?

Container:
Changes its width based on the width of the browser. The entire content of the website is going to be contained within the container – constrained by a width size. This one is the header container.

Container-fluid stretches all the way to the edges of the browser with about 15px of padding on both sides. This website does not have very much info. So you don’t want the content to stretch across the website.
Training Your Golden Doodle

Pooch Certified
Navbar-header is a “wrapper” class

```html
<header>
  <nav id="header-name" class="navbar navbar-default">
    <div class="container">
      <div class="navbar-header">
        <a href="#" class="pull-left visible-md visible-lg">
          <div id="logo-img" alt="Logo image "></div>
        </a>
      </div>
      <div class="navbar-brand">
        <a href="#">Training Your Golden Doodle</a>
        <p>
          <img src="images/paw-print.png" alt="Paw Logo">
          <span>Pooch Certified</span>
        </p>
      </div>
    </div>
  </nav>
</header>
```

http://getbootstrap.com/css/
Make navbars accessible

Be sure to use a `<nav>` element or, if using a more generic element such as a `<div>`, add a `role="navigation"` to every navbar to explicitly identify it as a landmark region for users of assistive technologies.

```html
<nav class="navbar navbar-default">
    <div class="container-fluid">
        <!-- Brand and toggle get grouped for better mobile display -->
        <div class="navbar-header">
            <button type="button" class="navbar-toggle collapsed" data-toggle="collapse" data-target="#bs-example-navbar-collapse-1" aria-expanded="false">
                <span class="sr-only">Toggle navigation</span>
            </button>
            <a class="navbar-brand" href="#">Brand</a>
        </div>
        <!-- Collect the nav links, forms, and other content for toggling -->
        <ul class="nav navbar-nav">
            <li class="active"><a href="#">Link (current)</a></li>
            <li><a href="#">Link</a></li>
            <li class="dropdown">
                <a href="#" class="dropdown-toggle" data-toggle="dropdown" role="button" aria-haspopup="true" aria-expanded="false">Dropdown</a>
                <ul class="dropdown-menu">
                    <li><a href="#">Another action</a></li>
                    <li><a href="#">Something else here</a></li>
                </ul>
            </li>
        </ul>
        <form class="navbar-form navbar-left">
            <input class="form-control" placeholder="Search" required/>
            <button class="navbar-btn btn-primary">Submit</button>
        </form>
    </div>
</nav>
```
<!DOCTYPE html>

</body>
Changing the collapsed mobile navbar breakpoint

The navbar collapses into its vertical mobile view when the viewport is narrower than 768px. The default value is 768px (the smallest “small” or “tablet” screen).

Make navbars accessible

Be sure to use a <nav> element or, if using a more generic element such as a <div>, add a role="navigation" to every navbar to explicitly identify it as a landmark region for users of assistive technologies.

EXAMPLE

Brand

```html
<nav class="navbar navbar-default">
  <div class="container-fluid">
    <!-- Brand and toggle get grouped for better mobile display -->
    <div class="navbar-header">
      <button type="button" class="navbar-toggle collapsed" data-toggle="collapse" data-target="#bs-example-navbar-collapse-1" aria-expanded="false">
        <span class="sr-only">Toggle navigation</span>
      </button>
      <a class="navbar-brand" href="#">Brand</a>
    </div>
    <!-- Collect the nav links, forms, and other content for toggling -->
    <ul class="nav navbar-nav">
      <!-- Add your nav links here -->
    </ul>
  </div>
</nav>
```
Rename this to something else... later on
<link href='https://fonts.googleapis.com/css?family=Lora' rel='stylesheet' type='text/css'>

<body>
<header>
    <nav id="header-nav" class="navbar navbar-default">
        <div class="container">
            <div class="navbar-header">
                <a href="#" class="pull-left visible-md visible-lg">
                    <div id="logo-img" alt="Logo Image"></div>
                </a>
            </div>
            <div class="navbar-brand">
                <a href="#">Training Golden Doodles</a>
                <p><img src="images/paw-print.png" alt="Pooch Certification" />
                <span>Pooch Certified</span>
            </div>
            <button type="button" class="navbar-toggle collapsed" data-toggle="collapse" data-target="#collapsible-nav" aria-expanded="false">
                <span class="sr-only">Toggle navigation</span>
            </button>
        </div>
    </nav>

  </ul>
</div>
Let’s style the collapse button 😊
#nav-list a:hover {
    background: #fff;
}
.navbar-header button.navbar-toggle, .navbar-header .icon-bar{
    border: 1px solid #295ba6;
}
.navbar-header button.navbar-toggle {
    clear: both;
    //margin-top: -30px; /* the heading too big shrink text */
}
.navbar-header button.navbar-toggle, .navbar-header .icon-bar {
    border: 1px solid #295ba6;
}
Remember media queries?

Let’s start with the medium device size
```css
.navbar-header button.navbar-toggle, .navbar-header .icon-bar {
    border: 1px solid #295ba6;
}

/*** large devices only ***/
@media (min-width: 1200px) {
}

/*** medium devices only ***/
@media (min-width: 992px) and (max-width: 1199px) {
    #logo-img{
        background: url('..//images/golden-logo-medium.png') no-repeat;
        width: 100px;
        height: 100px;
        margin: 5px 5px 5px 0;
    }
}

/*** small devices only ***/
@media (min-width: 768px) and (max-width: 991px) {
}

/*** extra-small devices only ***/
@media (max-width: 767px) {
```
